Call for participants - Youth Exchanges Green Media ?

During **3 weeks**, in an isolated castle in the middle of France, we offer you the opportunity to think and act about to the **power of media** linked to the **global environmental issue**.

This project is aiming to:

- Develop a **critical mindset** toward different medias.
- **Deconstruct populist stereotypes** to the global environmental issue.
- **Produce a Short-film** by expressing your creativity.

During the first week, we will enter into the topic by exchanging about the reality of media in your own country. And sharing their relationship to ecology.

The second week, we will visit some partners organisations to discover local initiatives more respectful for the environment.

The last week will be reserved to the film-production about the environment in order to fight against the environmental popular belief.

We are waiting for you !

Le Créneau is one of the regional delegations of **Solidarités Jeunes**. It is located in Montcombroux-les-Mines, in a rural area; and it has been acting for 25 years for social, educative and cultural local development. The goal of our association is to put together people from different social and cultural backgrounds to create diversity in order to learn to live together, to get to know each other, and to exchange about our own experiences with respect and tolerance. Thereby, we work with a lot of local partners to put citizen actions in the spotlight.
